(54) Title: DENTIST'S MIRROR

(57) Abstract: The invention relates to a dental in-strument comprising a mirror and a suction device having an inlet. Liquid from the patient's oral cavity is sucked up through said inlet by said suction de-vice. The reflecting surface of the mirror is passed through by an opening, which during use of the in-strument forms the mouth of said inlet, the reflecting surface of the mirror thus being flushed clean by the liquid flowing across it.
